

Discrepancies, contingency planning and liabilities

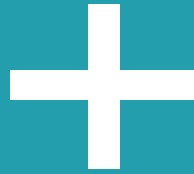

Radiology Reporting

- + Rigorous in-house auditing & client discrepancy
- + Regular and robust in-house audit by independent radiologists
- + Monthly audit reports to clients
- + Swift, effective escalation pathways

“Our information security processes are fully compliant with the strictest of standards. We take complaints and queries very seriously, and we believe that we have robust processes that deal rapidly and effectively with any issues that arise in our routine practice.”

PROF SIMON PADLEY, BSc FRCP FRCR
Co-Founder & Clinical Director (Governance Lead) | DMC Radiology Reporting

HEALTHTRUST EUROPE

Robust clinical governance program

Our audit occurs throughout the week, so issues can be dealt with swiftly before impacting on patient outcomes. All audits are lead by our Clinical and Medical Directors and undertaken by independent auditing teams. We provide monthly reports to the clients on the outcomes of this audit.

Low discrepancy rates

As we employ only subspeciality radiologists, reports returned by our clients, as discrepancies, are few and far between. Each discrepancy is reviewed by our clinical and medical directors at our monthly governance meeting.

Our key sub-speciality skills:

- HRCT of the Chest
- Cancer Staging (including RECIST evaluations)
- Lung Cancer Screening
- CT Colonography
- Prostatic Imaging
- Neuroradiology
- Head & Neck Imaging

A service underpinned by a robust governance and clinical framework.

A service backed by Carestream.

UK-based radiologists supported by our Operations Team will support your radiology needs 24/7, 365 days a year.
