

Working in partnership with
NHS Trusts delivering fast,
accurate Radiology Reporting

DMC
Radiology Reporting

The Right Study by the Right Radiologist at the Right Time

NATIONAL CHALLENGES

NHS radiologist workforce is short-staffed by 33%

1,939 consultants needed just to keep up with pre-coronavirus levels of demand for scans and surgery. A deeply worrying 44% shortfall is forecasted by 2025 (3,600 radiologists).

Delays in reporting of radiology examinations

Results in long waits for patients to get results and the risk of delayed diagnosis, impacting patient safety.

Quality concerns

One in three consultant clinical radiologists reported experiencing work-related stress. Increased strain to deliver the volume of reporting leads to a risk of burn-out and errors.

Complexity - increased workload pressures

The workload for complex CT and MRI scans is increasing at 7% each year.

Home working issues

Only 52% of consultant radiologists have home-reporting capability.

National ongoing issues with the recruitment and retention of radiologists not only has a negative effect on the timeliness of reporting, but also on clinical outcomes.

DMC RADIOLOGY REPORTING'S SOLUTIONS

RAPID CONNECTIVITY

Connection through our cloud-based PACS platform (Biotronics) or a direct VPN solution

RADIOLOGY PARTNERS YOU CAN TRUST

Dedicated teams of sub-speciality trained consultant radiologists

RECOVERY OF SERVICES

DMC Radiology Reporting is uniquely placed to support the recovery of services following Covid 19

DMC Healthcare are experts in partnering with NHS organisations and can support the development of the new Community Diagnostic Centres and the Targeted Lung Health Checks Programme

HOW DOES DMC RADIOLOGY REPORTING HELP?

DMC operates a **proven value-for-money** formula with enviably **low discrepancy rates (below 1%)**, as verified by our independent auditors.

Our **“get it right first time” approach** saves client’s time and money.

DMC Radiology Reporting is clinically led; Our network of UK-trained radiologists is supported by a highly responsive operations team.

Our **robust governance assurance framework** includes **new starter audits** and **regular auditing of CT/MR and plain film studies**.

We have a consistent and recognisable **reporting “house style”**

Digital innovation - We embrace the potential for AI solutions in all fields of radiology and are collaborating with AI software developers internationally.

24/7 - Soon to support out-of-hours reporting.

About DMC Healthcare

DMC Healthcare is a leading independent community-based provider of consultant-led, in-sourced routine endoscopy services to the NHS since 2015. It is also a leading provider of primary care, radiology reporting, dermatology and community services to the NHS. We are firmly rooted in the NHS, having been the partner of choice for nearly 55 years and currently work with 30+ NHS organisations and other partners, treating over 100,000 patients each year across 9 CCGs.
